### A guide to costs and charges

The above portfolio values have been calculated using the average daily value of your portfolio over the reporting period.

<sup>1</sup> **Service costs** - the charges for administering your product, any financial adviser charges, charges made by a discretionary fund manager for managing your model portfolio and any dealing charges on share trading, such as dealing fees and stamp duty.

<sup>2</sup> **Third party payments** - any payments received and retained from third parties in relation to financial instruments held.

<sup>3</sup> **Investment costs** - this includes charges made by the provider (e.g. fund manager) of investments held within your product. These are included within the fund, or instrument, price, so they are not shown separately on transactions.

**Retained interest** - the interest earned on any cash held in your account(s) but not paid out to you. This interest may be withheld by the firm or not paid out if you have opted not to receive it. The total amount of retained interest across all cash positions is £0.00.

### A guide to service costs

If you are using one product to pay adviser charges relating to other products, this will have the effect of reducing the total return on investment for that product and increasing the total return on investment for the other products.

- <sup>4</sup> **Platform charges** - the charges we make to cover the costs of administering your product.
- <sup>5</sup> **Adviser charges** - any payments deducted and paid to your financial adviser in relation to the service they provide to you.
  - **One-off fees** - One-off fees paid to your financial adviser.
  - **Ongoing fees** - Ongoing fees paid to your financial adviser.
- <sup>6</sup> **DFM charges** - the charges made by a discretionary fund manager for managing your model portfolio.
- <sup>7</sup> **Dealing charges** - this includes costs for buying and selling investments such as dealing fees, stamp duty and fx charges.

The total average value of your portfolio was **£29,984.52**. This figure includes all assets and cash held during the period, including assets that didn't incur any investment charges which aren't shown in this table. This amount is used to calculate the total charge percentage figures so they are represented as a proportion of your whole portfolio.

## A guide to our charges

These represent the charges made by the asset manager to administer the asset. These charges are included within the asset's price, so they are not shown separately on transactions.

Due to how we round percentage figures to display them in the table, the individual percentages shown in the table may not add up to the total percentage figures that are shown.

Please be aware that some assets may have product charges that are negative values. This is due to the way the regulation requires them to be calculated.

- 8 **One-off** - the one off charges include the entry and exit charges.
- 9 **Ongoing** - the ongoing charges are the charges for running the portfolio. These charges include but are not limited to the investment management fee, valuation fees, legal fees.
- 10 **Transaction** - the transaction costs are the costs incurred for purchasing and selling securities within the portfolio. Costs include brokerage commissions, stamp duty and spreads.
- 11 **Incidental** - the incidental costs include performance fees paid if certain performance levels are achieved (over and above any levels set out in the investment objective) within a set time period.
